• INTERPRETATION

Aspergillus Broth (AFPB) is a medium used for the isolation and cultivation of specific *Aspergillus* spp. Peptone and yeast extract provide the carbon, nitrogen, vitamins and minerals. Ferric ammonium citrate assists in the production of orange yellow pigment characteristic of *A. flavus*, *A. paraditicus* and *A. brasiliensis*. Dichloran is the antifungal agent to reduce diameters of spreading fungi. Chloramphenicol is a broad-spectrum antibiotic and inhibits a wide range of Gram-negative and Gram-positive bacteria.

• TECHNIC
